COMPANY OVERVIEW

Elucdate, LLC is a verified Service-Disabled Veteran-Owned Small Business (SDVOSB) specializing in Enterprise Risk Management (ERM), ServiceNow Integrated Risk Management (IRM) modernization, and Azure cloud governance strategy. Led by a Top-Secret cleared founder with over 20 years of federal leadership across USAID (Foreign Service) and the U.S. Army (DoD), Elucdate bridges the critical gap between executive budget governance, complex regulatory frameworks, and technology modernization. We assist federal agencies, defense integrators, and state authorities in eliminating compliance blind spots and accelerating operational resilience.

CORE CAPABILITIES

- **ServiceNow IRM & GRC Modernization:** Direct the strategic design and business requirements for ServiceNow IRM deployments, centralizing corporate policy, control frameworks, risk registers, and compliance mapping, with deep working knowledge of evidence-collection and continuous authority-to-operate (cATO) requirements.
- **AI Governance & Azure Cloud Strategy (OMB M-24-10 Alignment):** Translate OMB M-24-10 requirements into operational governance frameworks — model risk inventories, transparency requirements, and auditable data governance practices — for Azure-based AI and cloud environments.
- **Enterprise Risk Management (ERM) & Corporate Governance:** Establish enterprise-wide risk taxonomies, risk appetite frameworks, and executive dashboards aligned with OMB Circular A-123 and state-level standards.
- **Cyber Resilience & IT Audit Readiness Advisory:** Author internal control guidance and control remediation roadmaps; direct Zero Trust alignment initiatives and compliance-reporting automation strategy.

FEDERAL & STATE DIFFERENTIATORS

- **Elite Leadership & High-Trust Clearance:** 20+ years of federal program leadership directing complex, multi-country financial and operational missions for USAID and the U.S. Army. Active Top Secret clearance.
- **Dual-Socioeconomic Capture:** Certified SBA SDVOSB (Federal) and NYS SDVOB (State), offering prime contractors a direct mechanism to meet statutory procurement goals.
- **Technical Fluency + Strategic Direction:** Hands-on Azure administration fluency (Microsoft Software & Systems Academy) paired with direct experience specifying and directing ServiceNow platform modernization for federal enterprise risk management.

PAST PERFORMANCE HIGHLIGHTS

- **ServiceNow Financial Risk Assessment Platform:** Directed the design and business requirements for a ServiceNow IRM solution integrating federal fiscal standards, safeguarding multi-million dollar agency portfolios and improving control traceability for senior leadership.
- **Regional Financial Control & Data Modernization (USAID):** Directed financial system modernizations across multi-country missions, delivering automated data analytics, forecasting, and compliance reporting tools supporting Agency strategic objectives.
- **Civil-Military & Interagency Coordination (DoD/Interagency):** Served as USAID's Civil-Military Coordinator, aligning Agency financial and technology planning with CENTCOM objectives to strengthen interagency operational readiness.

RAPID ENGAGEMENT VEHICLES & PRICING

Elucdate offers flexible engagement structures scaled to client need, including fixed-price advisory sprints, fractional GRC program leadership, and time & materials task orders. Pricing available upon request.

Lean overhead enables scale-up through a professional network of former federal colleagues with government and security-clearance backgrounds, subject to individual clearance verification at time of engagement.
